

Central Dispatch APIs

Streamline and simplify every step of the transportation process with new Central Dispatch API integrations. Create and update listings, manage dispatches, and more – all while working more efficiently from your own systems.

API Features

Listing API

- Create, update and delete listings without leaving your platform

Fulfillment API

- Create, cancel or update dispatches (including vehicle, stops and dates)
- Provide dispatch status
- Archive dispatches
- Real-time tracking with geolocation information (available Q4)

Dispatch Document API

- Upload and download documentation
- Download a dispatch sheet
- Get eBOL document link

COMING SOON

Offer API

- Accept and reject offers or propose counteroffers to price and dates for a more fully integrated marketplace

Market Intelligence

- Utilize our unmatched volume of data to inform, optimize and execute your pricing strategy

 We are committed to the security and protection of all Central Dispatch users. Along with the APIs, we have deployed an additional layer of security to protect our marketplace, which may impact the use of bots and unauthorized plug-ins.

Take control of vehicle transport with Central Dispatch APIs.
